Page 14
5th Paragraph, 3rd line
The word "runtime" should be " compile time"

In Appendix A, Sample Questions and Answers

Page 301, **Chapter 2** Sample Questions
5) The answer shows "C" is correct , it should be "B".

Page 307

Chapter 7 Sample Questions
The text answers to questions 3-5 in Chapter 7 are wrong but
the actual alpha answers are correct.

The correct text answers should be:

3 - D (The answer in the book is correct but the associated
text is not.)
As there are no breaks in our code blocks, all blocks will be
executed after
the correct statement is encountered.

4 - B (The answer in the book is correct but the associated text
is not.)
Do while loops only test after the first executions and as such
will always
execute at least once.

5 - B (The answer in the book is correct but the associated text
is not.)

Page 313, **Chapter 12** Sample Questions

4) The answer shows "A" is correct. Answer "D" is also correct.

Page 319, **Chapter 17** Sample Questions
3) The answer should read, "B - Methods are attributes of a class."

Page 330, **Chapter 25** Sample Questions
4) The answer shows "C" is correct, it should be "B".
